DETAILED ACTION

Drawings

The drawings are objected to because of the following reasons:

Reference numerals are not uniformly drawn.

Solid black as in figure 4 is objectionable.

Parts in section must be hatched (see figure 2).

Hatching lines in figures 3 and 4 are rough.

Parts must be identified by reference characters, not by descriptive text as are the O-rings in figure 1.

In figure 1, the reference characters and the figure legend must be oriented identically.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the structure of claims 10 and 11 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the

renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

On page 3, line 7 from the bottom, "CRBC" is not defined. Does this mean carbon rice bran ceramic?

The specification and drawings are objected to for not identifying the collar with a reference numeral.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no basis in the specification for the structure as recited in claims 10 and 11. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3746

Claims 1 to 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 2 and 3, the motor, pump, sleeve bearing, stator, housing, can seal, rotor, shaft and seal are recited in a cataloguing and structurally disconnected manner. Since the structural and functional relationship between these elements cannot be ascertained, the scope of the claims is indefinite.

In claim 4, there is no antecedent basis for “the impeller side” and “the rotor side”. There is no recitation in claim 1 of a rotor and an impeller.

In claim 7, there is no basis for comparison for “short” and “long”.

Allowable Subject Matter

Claims 1 to 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Information Disclosure Statement

The information disclosure statement filed on September 20, 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Art Unit: 3746

The information disclosure statement filed September 20, 2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.
